

PET PROJECT-1: PITCH

Name of the Web App

Lense Crafted Shoot Blueprint

Description

Lense Crafted Shoot Blueprint is a web application designed for real estate photographers to plan and organize property photoshoots efficiently. It allows photographers to manage client and property details, generate customized room and equipment checklists based on property type and shoot requirements, and track completed shots to ensure a complete and professional photography session.

Feature List

Must Have Features

- Create a New Shoot:
 - Client name
 - Property address
 - Building type (house, condo, apartment, commercial)
 - Contact information
 - Date of shoot
 - Drone required (Yes/No)
 - Flash setup required (Yes/No)
 - Special client requirements
- Dynamic Room Checklist (Auto-Generated):
 - Checklist updates automatically based on property type
 - Example:
 - Houses: Exterior, Living Room, Kitchen, Bedrooms, Bathrooms, Garage and Backyard
 - Condos: Lobby, Living Room, Kitchen, Bedrooms, Bathrooms, and Balcony
 - Option to add additional rooms

- Dynamic Equipment Checklist:
 - Core gear: camera body, wide lens, tripod, SD cards (always included)
 - Drone added if selected
 - Flash kit added if selected
 - Option to add extra equipment based on client requests (e.g., virtual tours, staging)
- Interactive Checklist Tracking:
 - Mark rooms and equipment as completed
 - Visual indicators for completed items

Should Have Features

- Add or remove checklist items manually
- Notes section for extra instructions
- Automatic equipment toggling (excluding drone if not required)
- Completion message that all rooms are checked
- Progress Tracker:
 - Shows percentage of shoot completed
 - Room counter (Total/ Completed/ Remaining)

Nice-to-Have Features

- Dashboard view for upcoming shoots
- Calander-based shoot scheduling
- Search past shoots by client or property
- Export shoot details as PDF
- User authentication system
- Basic analytics (number of shoots per month, property type breakdown)
- Dark mode toggle
- Estimated shoot time display
- “Packing View” that shows only equipment checklist
- Color-coded checklist (green = done, yellow = in progress)
- Highlight missing items or incomplete rooms
- Quick Notes for each room
- Sort shoots by Date

- Optional Drone / Flash reminder if property type suggests it
- Mini Dashboard showing total shoots, upcoming shoots, completed shoots
- Edit or update shoot details after creation
- Filter shoots by status (upcoming / completed)
- Duplicate an existing shoot
